

Group Assignment – Rapid and Agile Application Development

Description: This is a graded and mandatory assignment that shall be solved and reported together with your assigned group.

This assignment needs to be done with relevant to your group software project completed during the 3rd year 1st semester.

Postmortem report

You should conduct a postmortem analysis of the project of your group assignment. The results of the postmortem meeting should be reported in a pdf file not longer than 10 pages.

1. Provide a clear description about your software project and Background of the project.
2. Which processes and practices did you use in your project? Show all the steps you have taken to complete the project starting from requirement gathering to deployment stage. describe what they constituted. (Include detailed description on each functionality of your project)
3. Based on the process description from question 2 and the detailed information, you should summarize how much time was spent (in total and by each group member) on the steps/activities involved as well as for the project as a whole?
4. For each of the techniques and practices used in your project you should answer the following.
 - a. What was the advantage of this technique based on your experience in this assignment?
 - b. What was the disadvantage of this technique based on your experience in this assignment?
 - c. How efficient was the technique given the time it took to use?
 - d. In which situations would you use this technique in a future project?
 - e. In which situations would you not use this technique in a future project?
 - f. If you had the practice/technique in a part of the project and not the entire project, how was using it compared to not using it?
5. For your next project which set of techniques (that you used here or that you have not used here but know from theory or other projects) would you use? Why? Clearly motivate your selected set of techniques and discuss how they complement each other. How much time is needed to effectively use the technique?
6. Compared to other projects using a more planned driven/waterfall process what were the benefits and drawbacks with the process used in this project?

7. What worked well in how you worked in this project?
8. What did not work well in how you worked on this project?
9. How did you work together as a group in the project? What worked and not in your interaction(s)?
10. What would you do differently in the future but similar project?

Rules of Conduct

This assignment is to be performed by and within your group. Be advised that any form of plagiarism will cause immediate failure on the course. Everything you hand in must be written by your group or properly quoted. Please note that you are responsible for everything that bears your name no matter if it is a group assignment or an individual assignment.
